

Unite Private Networks is THE top-of-the-line telecommunication company. We are seeking an experienced **Construction Technician – Field Service Engineer** for our **Field Operations** team. This role is a hybrid position and will primarily be responsible for handling the day-to-day operations to include estimating, permitting, contracting, designing, and maintaining of new building adds and existing Fiber facility relocations.

Specific responsibilities may include, but not limited to:

- Plan, direct and coordinate activities pertaining to the daily operation of the outside fiber plant.
- Installation, testing, service activation, and the day-to-day maintenance of UPN’s IP Core and Data networks
- Be involved in the supervision of construction contractors in the field.
- Oversees the resolution of all network issues within all data center colocation space and UPN-owned sites.
- Performs Inventory Management for new projects, spares/maintenance, and return/RMA activities.
- Provides onsite support for inventory audit & reconciliation processes.
- Develop accurate Outside Plant Fiber construction estimates for new opportunities and maintenance requirements.
- Ensures that all data center colocation spaces are maintained within site compliance standards (access, security, space management practices, and power).
- Monitors infrastructure builds and reviews/punch lists and approves work has met UPN’s construction standards.
- Maintaining a company provided vehicle.
- Computer skills necessary in Word, Excel, Visio, SecureCRT, Putty, SQL.
- Other duties as assigned by manager.
- On-Call services after normal business hours required.

Requirements:

- High school diploma or GED required.
- Minimum of 2 years experience with OSP fiber engineering and construction experience

Qualifications (What makes YOU stand out):

- Experience with Telecom
- Strong OSP construction knowledge with ability to read/red-line construction drawings to facilitate new builds, relocations, and emergency repairs.
- Exposure to permitting, engineering, contractor management, fiber splicing, project management, different types of underground and aerial cable plant installation and maintenance.
- Assumes responsibility for contribution to the success of major or multiple projects and is periodically called upon to make decisions.
- Cisco router and switching administration (29xx, 37xx, 72xx, 65xx models, ASR901, ASR903).

Qualified candidates interested in this opportunity should submit their cover letter and resume.
